

750L Foldable Bulk Container — 4-Way Entry

Collapsible Bulk Container | Eco-OzCrate-2

The Eco-OzCrate-2 is an Australian standard-sized **750L foldable bulk container** (1162 × 1162 × 785 mm) with **4-way forklift entry** and 2-way pallet jack access, engineered for efficient, space-saving handling of produce, bulk goods and returnable freight. Its **3:1 collapsible design** folds down to just **299 mm** when empty — cutting return-freight and static storage costs by up to two-thirds — while interlocking feet keep loaded containers stable when stacked. Manufactured from a durable mix of virgin PP/HDPE to ISO 9001 and ISO 14001 requirements, it is a versatile, reusable bulk-handling solution for agriculture, food and beverage, retail distribution, warehousing, manufacturing and general industry across Australia and New Zealand.

Image 2: Unfolded

Key Features

- 4-way forklift entry and 2-way pallet jack access for flexible handling in tight or high-traffic areas
- 3:1 folding collapses the container to 299 mm, slashing empty transport and storage costs
- Interlocking feet for secure, stable stacking of loaded containers
- Durable virgin PP/HDPE construction — strong, hygienic, moisture-proof and reusable
- 3000 kg static, 1000 kg dynamic and 500 kg beam-racking load capacity
- Optional lid available; built to ISO 9001 & ISO 14001 quality and environmental standards

Specifications

Type	Foldable bulk container (collapsible)
External dimensions	1162 × 1162 × 785 mm (±5 mm)
Internal dimensions	1082 × 1082 × 565 mm (±5 mm)
Collapsed height	299 mm
Fold ratio	3:1
Volume capacity	750 L
Weight	53 kg
Material	Virgin PP / HDPE
Load – static (UDL)	3000 kg
Load – dynamic (UDL)	1000 kg
Load – beam racking (UDL)	500 kg
Forklift entry	4-way
Pallet jack entry	2-way
Fork access height	110 mm
Racking locator recess	15 mm both sides
Optional extras	Lid
Compliance	ISO 9001 & ISO 14001
Origin	Made for Australia & New Zealand

Applications

- Fresh produce harvesting, cooling, storage and transport (agriculture & horticulture)
- Food and beverage handling, processing and distribution
- Retail and e-commerce distribution, stock transfer and returnable pooling systems
- Warehousing, manufacturing and general industrial bulk storage
- Automotive parts, components and bulk material handling
- Any operation needing space-saving, reusable bulk containers with a small return footprint
